Overview
Uninformed traffic safety decisions can cost lives. Understanding the factors that affect traffic safety will help decision makers choose the best traffic remedies for each situation, resulting in the prevention of crashes and decreased casualties.

Why Attend?
During this workshop, participants will:
- Learn how to make sound traffic safety decisions
- Gain a basic understanding of traffic safety issues and the factors that add or detract from roadway safety
- Learn why some “common sense” decisions can cause more harm than good

Registration
The Michigan Department of Transportation is providing a $40 scholarship to Michigan government agency personnel, reducing the cost of this workshop from $60 to $20 per person (private firms are not eligible for scholarship price). Fee includes workshop materials, continental breakfast, and break refreshments.

To register, contact the Center for Technology & Training (CTT) at ctt@mtu.edu or (906) 487-2102. Cancellations must be made at least 3 business days prior to the workshop to receive a refund.

Instructor
Dale Reed Lighthizer, Ph.D., P.E. is a Transportation Engineer with over 36 years of professional experience. He spent more than 20 years with the Michigan Department of Transportation (MDOT) where he developed and implemented the MDOT Local Safety Initiative, a major effort to support local agencies addressing local highway safety issues. Dale holds a B.S.C.E. from Michigan Tech, and a M.S.C.E. and Ph.D. from Michigan State University.
