2013 TRANSPORTATION ASSET MANAGEMENT CONFERENCE

"Asset Management - A Clear Path to Measuring Performance" is the theme of this year's Transportation Asset Management Conference. The Council has chosen this theme to provide each attendee with practical examples of best practices being applied at the national, state, and local levels, and practical guidance on how to measure the performance of both their organization and transportation assets. By doing so, it is our hope that attendees will be empowered by the guidance shared and will explore the potential benefits of applying each practice within their organizations.

The Council's overall goal for the conference is to put together an agenda filled with topics and speakers to convey this message and make this a positive and worthwhile experience for all involved. We look forward to your attendance, participation, and feedback on whether or not we accomplished this goal.

Thank you for your ongoing support and commitment to the Council and for implementing the principles of asset management.

Sincerely,

Carmine Palombo, P.E., Chair
Transportation Asset Management Council
